Pavilion Reflection of Infinity

Archetype team - 31/05/2024

The reflection of infinity enters a redevelopment of a park in the city of Gyumri in northern Armenia. the orientation of the pavilion is towards the Sev berd an important nineteenth-century fort and with the events of the history of this place. The pavilion serves as an observation point covered with a mirroring element. This reflection connects the statue of Mother Armenia to another important element representing in this way the strength, resilience, and protectiveness of the Armenian people.
