Plaza del Zarrón

Archetype team - 12/09/2025

The Plaza del Zarrón is envisioned as a space for everyone, addressing the natural flow and needs of all citizens in Almazán. By focusing on the wall and the old quarter and observing the movement of its inhabitants, the designing team aimed to create a fluid and inclusive link between the old town and the newer areas, bridging the five-meter elevation difference that previously acted as a barrier. This project prioritizes accessibility and connection, allowing everyone to freely move between parts of the town that were once separated.
