Sports hall and swimming center in Châtel-St-Denis, Switzerland | 3rd prize

Archetype team - 20/11/2026

The new triple sports hall and swimming center in Châtel-St-Denis is conceived as a compact, horizontally organized public building, carefully embedded in the natural slope of the site. Inclined glazed façades reduce the built volume, while deep roof overhangs provide effective protection from solar gain. Large openings welcome natural light, and frame views toward the surrounding landscape and the outdoor swimming basin to the south.
